ALLEYE

Computerized Maintenance Management System

Accurate vision, Faster decision, Efficient operation

OVERVIEW of how the ALLEYE™ CMMS
software can improve the efficiency of your team, while
staying compliant and easily meeting data integrity standards

ALLEYE™ is the only CMMS software specificaly designed for pharmaceutical industries, by the industry experts to **manage equipment inventory**, **qualification activities** and **tasks in a GxP laboratory or production area**, **complying to FDA 21 CFR Part 11** and to the **ALCOA+ principles.**

The software also provides **customizable reports** and **planning tools** to efficiently manage the workload and capacity of your team.

Central management of all equipment records can significantly reduce the effort of planning, decision making, communication, and investigations through advanced searching and filtering functionalities, and extensive management graphic dashboard.

ALLEYE

Stay on the top of your tasks in one secure place and enjoy an enhanced communication channel

No more looking for logbooks or dealing with Excel sheets!

Get automatically notified from client requests completed and registered in a well-structured form!

- One secure place to plan and document all your activities, available at your fingertips

Reporting instrument problems and getting status feedbacks, is not a hassle anymore!

- Reporting a problem instantly from your mobile device
- Follow the progress of your requests in real time
- Easy access to verify the equipment status and history

No more disturbance by e-mail, notes, calls, or small talk!

EQUIPMENT RESERVATION

Coordination and Reservation of equipment simplified

comprehensive traceability for all reservation ticket changes

gives clear and detailed record of all modifications

designed to prohibit reservation conflicts

ensuring equipment is always available when needed

prevents double-bookings

This modern platform allows you to seamlessly reserve crucial and high-demand equipment, ensuring that your team can efficiently coordinate its use.

The intuitive system provides a user-friendly interface to manage and track all reservations, reducing the likelihood of last-minute changes and cancellations.

Leading to better organization, improved productivity, and a more streamlined process for managing equipment reservations.

OFF YOUR SHOULDERS, UNDER CONTROL!

ALLEYE eliminates instrument, maintenance and usage log books from the floor and manages the followings for you

✔ Electronic equipment maintenance and usage logbooks

✔ Equipment and Instrument Inventory

✔ Equipment Calibration and Qualification schedules

✔ Equipment repair requests and ticketing

✔ Equipment reservation

✔ Maintenance team capacity and workload calculation and visuals

✔ Job dispatching

DYNAMIC ELECTRONIC LOGBOOKS

**Straightforward interface recording Instrument usage
&
Maintenance record-keeping**

Accessible by MULTIPLE users simultaneously!
*So everyone on your team can access
the latest information at any time*

INSTRUMENT LOGBOOK

What are assets of this ALLEYE CMMS feature?

Ensured complete traceability!

Equipping data reviewers with the necessary **tools to review** and **sign off** on **equipment logs** as part of the **data review process**

How is the instrument logbook contributing to the efficiency of managing equipment usage data?

Having records **easily accessible for future searches**, facilitates **quick responses** to questions that may arise **during laboratory investigations.**

Enhancing accuracy and accountability!

MAINTENANCE LOGBOOK

*This feature **automatically** extracts and records all relevant events, creating **a complete and chronological history***

INCREASED EQUIPMENT MANAGEMENT EFFICIENCY

Get the visibility you deserve to manage your team and increase productivity

Stay on the top of your data by having real-time access to:
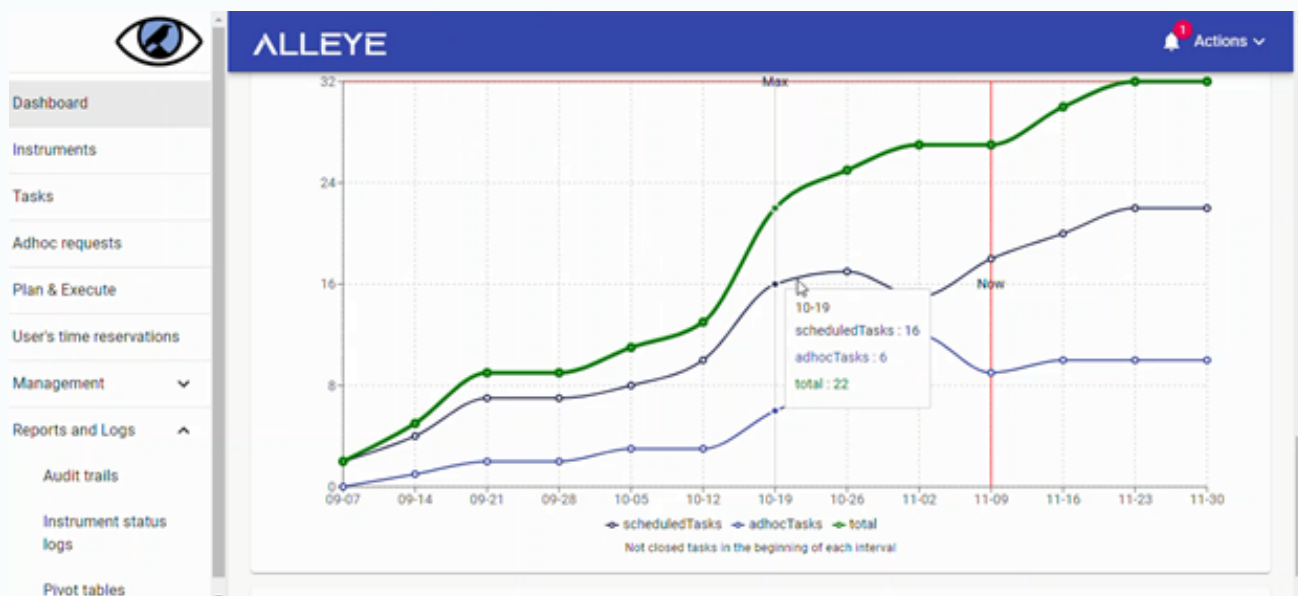

Visibility on "who is doing what?"

No need to search multiple systems and notebooks to perform instrument life cycle review!

The instrument and task records have cross reference information to LIR, RNC and CC records.

Enjoy pre-designed graphs, as well as pivot functionalities..

- Equipment status updates
- Workload and Capacity information
- Qualification, PM and ad-hoc task status updates
- Performance KPI, Backlog, Backlog trend, Instrument Down-Time, overdue tasks, and team performance.

CUSTOM DASHBOARDS

Beyond the standard dashboards and real-time graphs that ALLEYE already provides, users can now take advantage of the Custom Dashboard functionalities!

This advanced feature empowers users to link external **Business Intelligence (BI) tools** and incorporate **customized graphs** directly into the Alleye platform

By doing so, users can create **personalized data visualizations** tailored to their specific needs and access them seamlessly within the application

This integration not only enhances the analytical capabilities of ALLEYE, but also provides a more comprehensive and **user-centric approach to data management and visualization**

Whether you're looking to track specific metrics or analyze complex data sets, the Custom Dashboard feature ensures that all your critical information is readily accessible and visually engaging!

ALLEYE provides all the necessary functionalities to comply with
FDA 21CFR Part11 requirements

✓ **Configurable Electronic Signatures and comments.**

✓ **Session Lock-out, with configurable Lock-Out time.**

✓ **Secured and centralized Date and Time stamps, supporting Time Zone differences.**

Full version Audit trail on all records ✓

Two level task approval cycle. ✓

Unique user accounts for login. ✓

Configurable Role-based Access and Rights. ✓

COMPLIANCE AT YOUR FINGERTIPS

Fulfill regulation and data integrity requirements efficiently with ALLEYE™ software

Ensure traceability and data integrity according to the **ALCOA+** framework throughout standardized workflow and easy access supported mobile technology.

Attribute all data manipulations, by keeping audit trail and electronic signatures, a hand to support compliance with regulations such as 21 CFR Part 11.

Access all your data quickly and easily during an audit with guaranteed **L**egibility.

Facilitate **C**ontemporaneous and **O**riginal data entry by making it easy and accessible at your fingertips and eliminate data transcriptions.
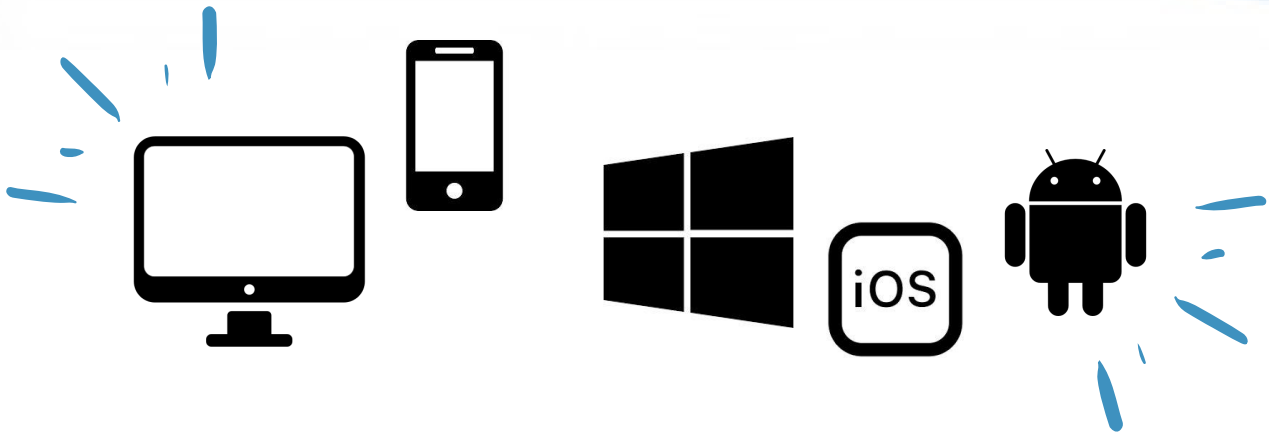

Enhance data **A**ccuracy and Completeness, by applying auto validation rules on data entry fields and using rational data relations.

✚ Streamline and Secure your PM, Qualification logs by replacing instrument logbooks with electronic records and keep data quality high.

GAMP 5 validation packages with automated testing are available to accelerate ALLEYE integration in your organization.
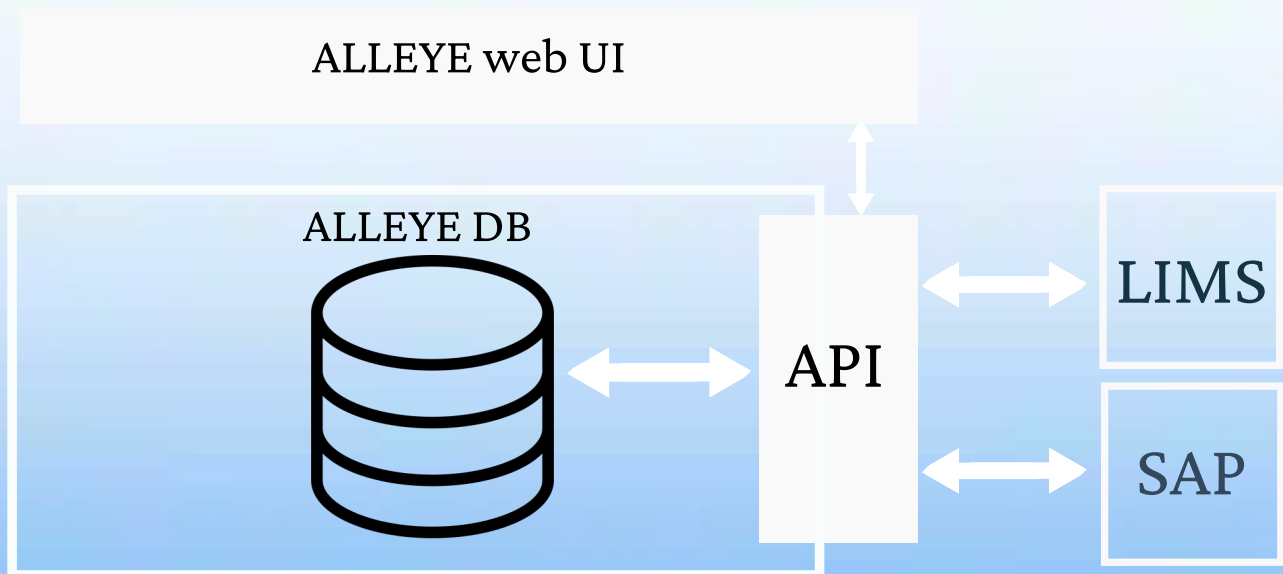

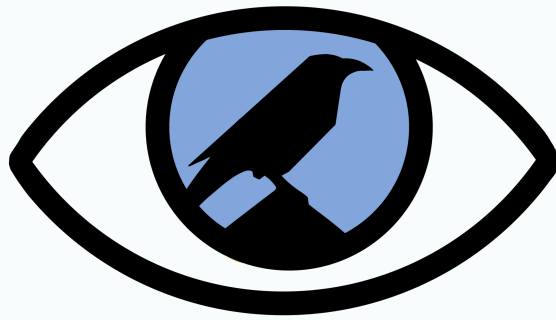

TECHNOLOGY SUPPORT AND INTERFACING

**ALLEYE™ works with both desktop,
and mobile technologies.**

This open equipment management software supports
Windows, **IOS** and **Android** operating systems.

ALLEYE™ provides endless possibilities of interfacing with
other existing systems through **secure API access** functionalities.
